

50 Selected Proposals for the INNOLABS 1st Open Call!

50 Selected Proposals in the 1st Open Call!

117 project proposals were submitted for the INNOLABS 1st Open Call representing 24 countries. Now a selection of **50 projects** is going to engage with the Consortium during an **acceleration period** of nine months.

The Consortium has been working hard to evaluate and choose the best proposals together with a team of external experts. The **top 25 companies** join the acceleration period and are supported with **EUR 30,000 in cash, 10,000 EUR in innovation vouchers, and a roll of innovation services** provided by the Consortium.

The **25 runners-up** also get support: **5,500 EUR in innovation vouchers plus the innovation services** by the Consortium. [Keep reading](#)

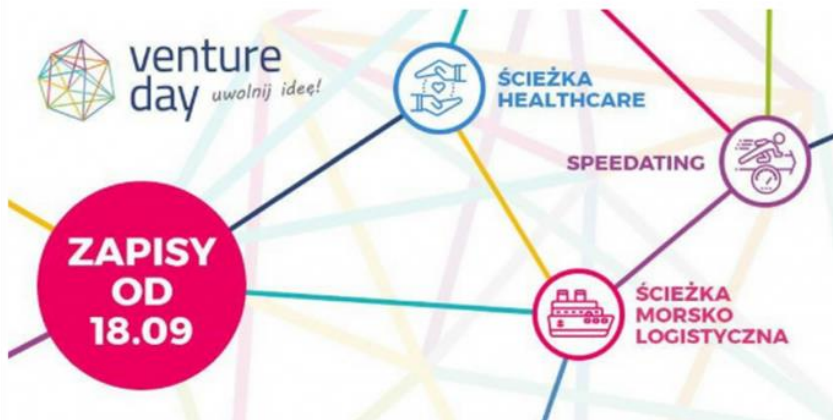

WELCOME ON BOARD!

INNOLABS 1st Open Call

The INNOLABS Acceleration Programme Begins!

The INNOLABS Consortium is about to start the **acceleration period** with the 50 awarded teams. Our **qualified experts will guide the teams** through their development path to scale up their business activities in **collaboration with Key Account Managers** designated by the Consortium.

Venture Day 2017 in Gdańsk

Interizon Foundation, one of the INNOLABS Consortium partners, organized its first satellite event on the occasion of the 5th edition of the **Venture Day conference held in Gdańsk on 15-16 November 2017**.

The Venture Day gave **INNOLABS** representatives the opportunity to address a key audience composed of entrepreneurs, healthcare professionals, makers, start-uppers, policy makers and regional players in the field of innovation and health.

Embracing the Promise and Challenges of Precision Medicine

The **precision medicine** concept promises to revolutionize patient care and treatment with a more proactive and predictive approach to medicine, with an emphasis on **disease prevention** rather than on treatment of symptoms.

Most healthcare providers believe precision medicine is important to the health and well-being of patients, yet many are uncertain about how to integrate it into their organizations, according to the recent **HIMSS Analytics Survey "Future Proofing Healthcare: Precision Medicine"**.
