

Looking for new cross- sectoral
health solutions for
personalized health!

A Cluster-facilitated project
to support new value chains
in the healthcare sector.

WHAT WE DO

INNOLABS will invest 3.75 Million EUR with the aim to foster collaboration, transfer of knowledge and opportunities among European SMEs from different countries and sectors in order to develop, improve and deliver disruptive technologies for personalized health. INNOLABS' focus is on solutions for ageing populations and rural areas that incorporate mHealth technologies.

INNOLABS will select more than 100 innovative project ideas to accelerate and further support monetarily and with innovation services.
